

GRANITE ADHESIVE

Product Description

Cement based; reduced slip property and enhanced with additives for high performance adhesive mortar.

Areas of Use

- Residences, hospitals, shopping centers etc.
- In vertical and horizontal applications,
- For bonding materials such as granite, ceramic, natural granite, marble,
- For use in large format coating materials,
- Used in external facades for granite and ceramic bonding.

Features and Benefits

- Easy to prepare and apply,
- Has high adhesion,
- Does not slip in vertical applications,
- Long working time.

Application Instructions

25 Kg of IKS GRANITE ADHESIVE in the Kraft bag is mixed with 7-8 liters of water until a homogeneous mixture is obtained, left for 1-2 minutes before application and mixed again before application.

Mixing Ratio	6.5-7 lt water / 25 kg powder
Consumption	4-5 kg / m ²
Initial bond strength	≥ 1 N/mm ²
Bond strength after water immersion	≥ 1 N/mm ²
Bond strength after heat aging	≥ 1 N/mm ²
Bond strength after freeze-thaw cycles	≥ 1 N/mm ²
Open time 20 min	≥ 0,5 N/mm ²
Slip	NONE
